DATA ANALYST

AI & Data Science graduate focused on turning structured data into actionable analysis and decision support. Hands-on experience with SQL/MySQL, Python, EDA, data cleaning, validation, trend analysis, visualization and analytical reporting across ITSM, financial, housing and movie datasets.

Education

Dhirajlal Gandhi College Of Technology 2021 – 2025
B.Tech – Artificial Intelligence and Data Science | CGPA: 7.8

Work History

Data Science Consultant, Intern | Rubix – AI Solutions Bengaluru (Onsite) | Jun 2025 – Jan 2026

- Developed and evaluated machine-learning workflows using Python and Scikit-learn for classification and regression tasks.
- Applied EDA, statistical analysis, preprocessing and feature engineering on structured datasets for data-driven analysis.
- Contributed to the IT Incident Management client project using approximately 46K enterprise records for incident prioritisation.
- Completed the Certified Data Scientist programme through the DataMites learning pathway alongside project and practical work.

Full Stack Developer | Aggregate Intelligence Inc Coimbatore (Onsite) | Aug 2024 – Jan 2025

- Worked onsite on full-stack app development, contributing to backend integration and application workflows.
- Developed Python backend components and REST APIs for application and data-integration workflows.
- Worked with MySQL/database operations and SQL query optimisation, with approximately 20% lower query latency.
- Used Git/GitHub and Docker in application development, testing and integration workflows.

Data Science Course & Projects | EdiGlobe Pvt Ltd Bengaluru (Virtual) | Aug 2024 – Oct 2024

- Completed structured self-paced Data Science learning and project work using Python and data-analysis libraries.
- Performed data cleaning, EDA, statistical analysis and visualization using Pandas, NumPy, Matplotlib and Seaborn.
- Applied preprocessing and feature engineering to prepare datasets for predictive modelling and analysis.
- Completed House Price Prediction and IMDb Movie Data Analysis projects.

Skills

- **Programming & Data:** Python, SQL, MySQL, Pandas, NumPy, Matplotlib, Seaborn
- **Data Analysis:** Data Collection, Data Cleaning, EDA, Statistical Analysis, Descriptive Statistics, Correlation Analysis, Trend Analysis, Pattern Recognition, Data Profiling, Data Validation
- **Predictive Analytics:** Feature Engineering, Data Preprocessing, Classification, Regression, Random Forest, XGBoost, Model Evaluation
- **SQL & Tools:** SQL Query Writing, SQL Joins, Aggregations, Filtering, MySQL, Git/GitHub
- **Training / Basics:** Excel, Power BI, Tableau, VLOOKUP

Certifications:

- **Certified Data Scientist — NASSCOM / FutureSkills Prime** | Gold Category | 91% Assessment Score | Apr 2026
- **Data Science Foundation — IABAC** | Effective May 2026
- **Certified Data Scientist (CDS-DS2050) — DataMites** | 700+ hours | IABAC / NASSCOM accredited
- **Data Science Foundations – Level 2 (V2) — IBM / Credly** | Sep 2025
- **Data Science 101 — IBM** | Sep 2025
- **Data Science Tools — IBM** | Sep 2025
- **Data Science Methodology — IBM** | Sep 2025
- **Python (Basic) — HackerRank** | Sep 2025

Projects

IT Incident Management using Machine Learning

- Analysed approximately 46K enterprise ITSM records from a live MySQL database for incident prioritisation and operational analytics.
- Goal: improve ticket triage and prioritisation and reduce manual effort in IT incident management.
- Applied SQLAlchemy, data cleaning, ITIL Impact × Urgency priority logic, feature engineering, Random Forest, Prophet and Gradient Boosting with SMOTE across separate workflows.
- Verified results included High-Priority Random Forest F1-score of approximately 0.98, Auto-Tagging around 83% and RFC-Failure around 93%.

Skills Applied: Python | SQL | MySQL | SQLAlchemy | EDA | Feature Engineering | Scikit-learn | Random Forest

Home Loan Default Risk Management

- Developed a machine-learning workflow using Home Credit data; application_train contains 307,511 rows, with seven CSV sources used in the broader analysis.
- Goal: identify customers at risk of loan default and support data-driven credit-risk assessment.
- Applied multi-table integration, preprocessing, memory-aware optimisation including Numba JIT, feature engineering and model comparison; SMOTE was used only for the RFC sub-model.
- Verified result: XGBoost was the strongest reported model at approximately 92% accuracy; XGB AUC was 0.760.

Skills Applied: Python | Pandas | Scikit-learn | XGBoost | Feature Engineering | Data Preprocessing

Earthquake Damage Prediction

- Developed a multiclass classification workflow for the DrivenData earthquake-damage dataset using structural and geographical features.
- Goal: predict building damage categories for data-driven post-earthquake risk assessment.
- Performed data merging, EDA, IQR-based outlier capping and OneHotEncoding; compared Logistic Regression, Decision Tree, Random Forest, XGBoost, LightGBM and CatBoost.
- Evaluated model performance to identify the most suitable approach for earthquake-damage classification.

Skills Applied: Python | Pandas | Scikit-learn | XGBoost | LightGBM | CatBoost | EDA

IMDb Movie Data Analysis

- Performed exploratory analysis on an IMDb movie dataset containing 1,000 movies and 12 columns.
- Goal: identify movie trends, relationships and data-quality patterns across ratings, revenue, votes, runtime and related fields.
- Performed 22 EDA tasks covering cleaning, missing-value checks, statistical summaries, correlations, distributions and visual analysis.
- This is an EDA project only; no sentiment-classification model is claimed.

Skills Applied: Python | Pandas | NumPy | EDA | Statistical Analysis | Data Visualization

House Price Prediction

- Built a regression model using the Boston Housing dataset containing 506 observations and 13 features.
- Goal: estimate housing prices from structured property features.
- Applied missing-value handling, Standard Scaler preprocessing and Linear Regression with regression evaluation.
- Verified performance: $R^2 = 0.6589$ and $MAE = 3.1499$.

Skills Applied: Python | Pandas | Scikit-learn | Regression | Linear Regression | StandardScaler
